DevOps Engineer | AWS | Terraform | Docker | Kubernetes | CI/CD

PROFESSIONAL SUMMARY

DevOps and Cloud enthusiast with 5 years of experience in production support and data operations within a large-scale retail environment. Experienced in monitoring batch data pipelines, troubleshooting production issues, and maintaining operational dashboards for over 600 retail stores. Skilled in AWS, Terraform, Docker, Kubernetes, CI/CD pipelines, and Linux environments with a strong focus on automation, infrastructure provisioning, and system reliability.

TECHNICAL SKILLS

Cloud: AWS (EC2, S3, VPC, Security Groups, IAM, Route53)
Infrastructure as Code: Terraform
Containers: Docker, Docker Compose
Container Orchestration: Kubernetes (Pods, Deployments, Services, Ingress – basic)
CI/CD: Jenkins, GitHub Actions, GitHub Webhooks
GitOps: ArgoCD
Monitoring: Prometheus, Grafana
Operating Systems: Linux (Ubuntu)
Version Control: Git, GitHub
Scripting / Querying: SQL, Basic Python
Visualization: Tableau, Excel Dashboards

PROFESSIONAL EXPERIENCE

Tata Consultancy Services (TCS) – Chennai, India
IT Analyst
2019 – 2024

• Supported production data processing systems for Landmark Group (Dubai), managing operational data pipelines across more than **600 retail stores**.

• Monitored and validated daily batch processes including **Start-of-Day (SOD), End-of-Day (EOD), and DIMB data imports** to ensure accurate retail transaction processing.

• Investigated and resolved **production incidents** by analyzing database records using **SQL** and validating system processes in **Linux environments**.

• Diagnosed store-level operational issues by accessing store systems and verifying **data synchronization across databases and file transfer pipelines**.

• Monitored **Managed File Transfer (MFT)** workflows to ensure reliable transfer of store transaction data across systems.

• Developed and maintained **operational dashboards using Excel and Tableau** to track store processing status, pending imports, and operational metrics.

• Generated daily **operational reports** summarizing system health, pending processes, and production incidents for business stakeholders.

• Collaborated with cross-functional teams to **troubleshoot incidents and improve operational reliability** of production systems.

DEVOPS PROJECTS

E-Commerce DevOps Pipeline – Built end-to-end DevOps workflow using **AWS, Terraform, Docker, Kubernetes, GitHub Actions, and ArgoCD.**

Terraform AWS Infrastructure – Provisioned **VPC, subnets, EC2, ALB, and S3** using Terraform for scalable web infrastructure.

CI/CD Pipeline Project – Automated build and deployment of a **Dockerized Nginx application using GitHub, Jenkins, Kubernetes, Prometheus, and Grafana.**

EDUCATION

Bachelor of Technology – Information Technology
Sri Ramakrishna Engineering College, India

LANGUAGES

English – Professional Proficiency
Dutch – Intermediate
